

## Replacing the Battery in Crystal Pet Immune PIR Motion

**CAUTION!** Risk of explosion if battery is replaced by an incorrect type. Dispose of used batteries according to the manufacturer's instructions.

**WARNING!** This product contains a coin battery. If it is swallowed, it can cause severe internal burns in just 2 hours and can lead to death. Keep new and used batteries away from children. If the battery compartment does not close securely, stop using the product and keep it away from children. If you think batteries might have been swallowed or placed inside any part of the body, seek immediate medical attention.

The TX+PIR comes pre-installed with a single Panasonic CR-123A Lithium battery that provide up to 8 years of battery life under normal usage conditions. When the battery is low, a signal will be sent to the control panel.

To replace the battery, do the following:

- 1) With the sensor mounted, remove the front cover from the back housing.
- 2) Remove the existing battery and re-install new Panasonic CR-123A battery. When inserting the battery, pay close attention to the battery polarity indicators to ensure proper placement of the battery.
- 3) Replace the PIR cover and perform a sensor test to ensure proper communication to the panel/receiver.
