

Notifications (CMSONE)

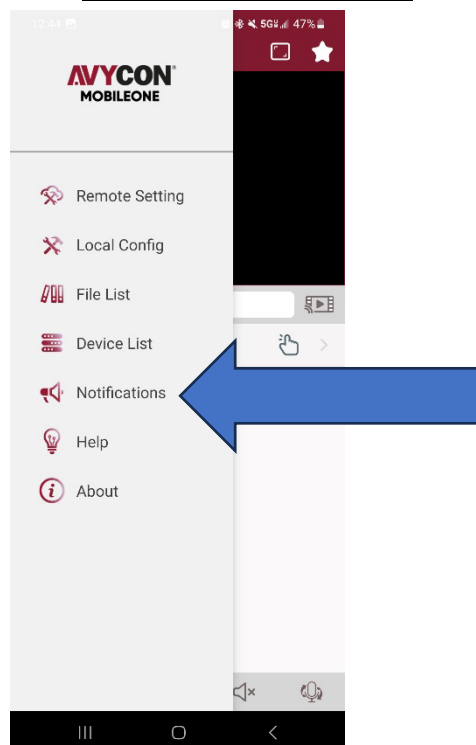

Open app

Click circle with 3 dots in it

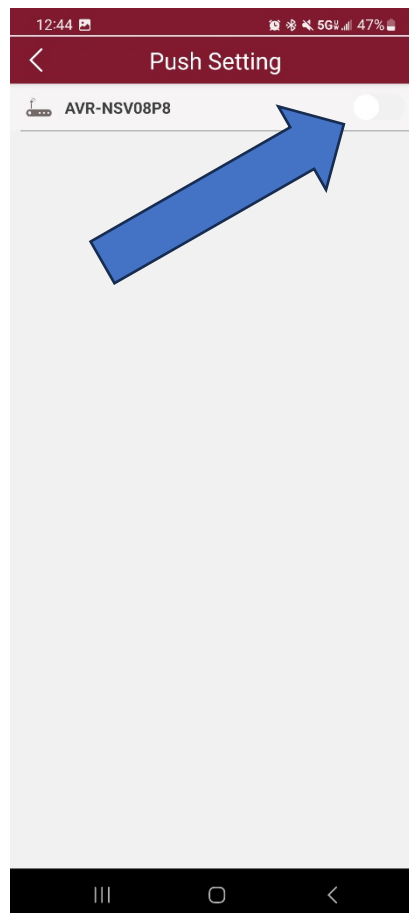

Click on Notifications

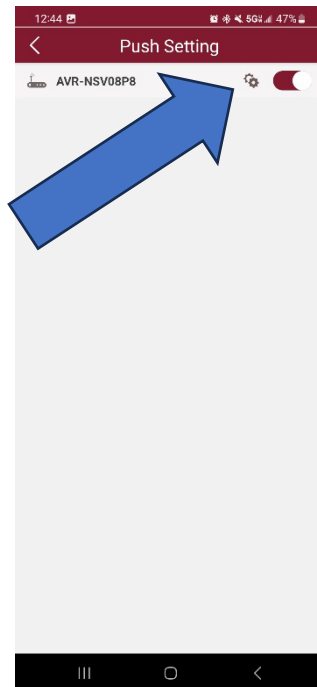

Click on Gear

Click on white dot to the right of your recorder
(This will be what you use to turn notifications off
if you ever wanted/needed to)

Click on the gears

All highlighted in red will be what it sends notifications for (I do not recommend any motion detection notifications on as it will spam your phone anytime it catches anything moving)

Click save on top right when done
