

Replacing the Battery IQ TILT S-LINE Sensor QS1131

CAUTION! Risk of explosion if battery is replaced by an incorrect type. Dispose of used batteries according to the manufacturer's instructions.

WARNING! This product contains a coin battery. If it is swallowed, it can cause severe internal burns in just 2 hours and can lead to death. Keep new and used batteries away from children. If the battery compartment does not close securely, stop using the product and keep it away from children. If you think batteries might have been swallowed or placed inside any part of the body, seek immediate medical attention.

Requirements:

- 2 CR2032 Lithium Batteries
- Flathead Screwdriver or Butterknife
- System must be disarmed to prevent false alarms.

STEP BY STEP INSTRUCTIONS:

1) Open the Device

There will be a tab on the bottom of the device to press on and release the device from the mounting plate. This will cause the panel to beep rapidly due to the tamper. You may ignore this or tap anywhere on the screen to silence the beeping.

2) Replace the Battery

Remove the old batteries, and insert the new batteries in place. Please mind the polarity (+ side faces up).

3) Mount the Device

Mount the device back on the mounting place in reverse of step 1.

4) Clear the trouble

You can easily clear troubles by Arming or Disarming the system.
